Dr. Fischer EYE-CARE® VISION Forte

Eye drops for lubrication and hydration
Hypromellose 0.2% and Sodium Hyaluronate 0.2%
Preservative Free, 10 ml

Please read carefully before using the product

EYE-CARE VISION Forte Sterile eye drops with lasting moisturizing and lubricating activity with physiological pH, based on Hypromellose and Sodium Hyaluronate. **EYE-CARE VISION Forte is Preservative Free**, thanks to its packaging that can preserve the microbiological, chemical and physical properties of the eye drops. The lack of preservatives allows contact lens wearers to use Dr. Fischer Eye-Care Vision Forte eye drops without having to remove their lenses.

Hypromellose is a viscous polymer with hydration capabilities that can stabilize and recreate the tear layer on the surface of the eye by creating a transparent, viscoelastic protective layer. Hypromellose protects and lubricates the surface of the eye, reducing feelings of discomfort and soothing irritated eyes.

Sodium Hyaluronate is a viscous polymer that provides moisture and lubrication, and provides a remedy for dry eyes. Like Hypromellose, Sodium Hyaluronate creates a layer that protects the lining of the eye from external factors and from free radical damage.

EYE-CARE VISION Forte - DOUBLE ACTION relieve dry eye symptoms, such as redness, burning sensation, irritation and foreign body sensation, and help restore the natural outer eye layer.

EYE-CARE VISION Forte - Combination of two viscous components that provide both lasting moisture and a lubricative effect on the eye surface.

EYE-CARE VISION Forte drops alleviate dry eye syndromes, including computer use-related syndromes, infrequent blinking and the effects of certain medical treatments, environmental pollution, dry environments (such as those caused by air conditioning, wind and sun) and ocular pressure as a result of use of contact lenses.

Instructions for use:

- It is important to keep Hand hygiene when using eye drops - Use soap and water, or use Dr. Fischer ALCO-GEL to clean your hands without the need for soap and water.
- Before using the product for the first time, tear the seal ring that guarantees the initial use of the product;
- Open the bottle by removing the protective cap;
- Tilt your head slightly backward and drip 1-2 drops into each eye by lightly pressing on the bottle;
- Close the bottle after use: the contents must be used within 6 months of when the bottle was first opened;
- The drops are suitable for frequent use. Unless your attending doctor instructed you otherwise, you can even use the product several times a day (2-3 times or more, if necessary) to provide adequate moisture. Because dry eye is a condition that varies from person to person, use the drops at a frequency that is suitable for your needs, in order to provide relief from the dry eye syndrome you are suffering from.

The gradual emptying of the bottle may result in having to exert greater pressure to extract the product. This stems from the hermetic packaging designed to preserve the sterility and the chemical and physical characteristics of the preservative-free solution.

Composition:

Sodium Hyaluronate 0.2%, Hypromellose 0.2%, Boric Acid, Sodium Tetraborate decahydrate, Sodium Chloride, WFI contains no preservative or phosphates

Warnings and cautions:

- The product is intended for use by one patient only.
- The product is intended for ophthalmic use only.
- Do not use the product if it appears, upon opening, that the container is defective or not completely sealed.
- During use, do not touch the eyes or any other surface with the dropper of the container.
- Treatment is forbidden to patients with a history of hypersensitivity to one of the product's components.
- In the event of problems/irritation/discomfort during treatment, please discontinue use and contact your physician.
- Do not use after the expiration date indicated on the packaging and on the label. Dispose of properly the container after use.
- Keep out of the reach of children.

Common side effect:

The product may cause short-term blurred vision after use. Do not drive or operate machines until your sharp vision returns. If this problem persists or worsens, contact your attending physician immediately.

Packaging:

A bottle 10 ml in volume, Preservative Free.

Storage conditions:

Do not store above 30°C.

After the initial opening, use the contents within 6 months.

Expiration:

If the packaging is closed, do not use after the expiration date indicated on the packaging and on the label of the bottle.
